

MONOCOAT OIL PLUS MAINTENANCE

Furniture & Millwork

The first week after the application of **Rubio Monocoat Oil Plus** furniture and fixtures should only be cleaned with a dry cloth or a duster. Wipe up spills as they occur. After the first week a dampened cloth, well wrung, can be used to clean spills and spots. Three weeks after the application the pieces can be cleaned with **Monocoat Surface Care Spray. RM Oil Plus 2C** is water resistant after one week and liquids can be used for cleaning. Normal day to day cleaning can be done with a cloth or duster.

Treating your oiled furniture with **Monocoat Refresh** every 12 to 24 months will greatly extend the life of the finish. **Refresh** is a revitalizing treatment oil that restores and protects surfaces treated with **Monocoat Oil Plus. Refresh** is used when the surface looks dry or rough in areas where the finish has worn. Maintenance with **Refresh** will replace the oil that has worn away and add protection to that area

1. Clean the surface.
2. Apply **Monocoat Refresh** on to the surface to be treated and spread with a cloth. Use a minimal amount of the product to prevent the surface from becoming sticky.
3. Allow the product to react for five minutes.
4. Wipe the surface dry with a cloth or paper towel. Polish until the surface feels completely dry.
5. Work in zones that can be fully wiped dry within 15 minutes.
6. The surface will be completely dry and usable after 5 hours.

Refresh is available in a 400 ml. spray can, .5 & 1 liter cans.

Consumption: +/- 1,075 s.f. / liter

Oil-saturated cloths can spontaneously combust and must therefore be burned, placed in water or kept in a lidded-sealed metal container.
