

## RAW WOOD CLEANER

### DESCRIPTION:

**Rubio Monocoat Raw Wood Cleaner** is used as a cleaner for raw wood surfaces before the application of **Monocoat Oil Plus**. It also removes the natural oils from the surface of exotic wood species preventing a blotchy finish. This product can also be used to clean the materials that were used during the application. **Raw Wood Cleaner** does not open the wood grain. There is no need to saturate the wood, tack the floor overall and use more product only on soiled areas.

Why use a small amount of **Monocoat Raw Wood Cleaner**?

- The revolutionary technology of **Monocoat Oil Plus** uses molecular reactions to ensure that the oil bonds with the wood fibers. If there is dust on the surface, the oil can bond with the dust. As a result, when spreading the oil a microscopic paste can form on the surface. The oil will have bonded with the dust instead of with the wood fibers.
- The cloth should only be slightly dampened with Rubio Monocoat Raw Wood Cleaner. In that way the dust will be collected electro statically.

### INSTRUCTIONS:

- \* Sand and vacuum the surface in the appropriate manner.
- \* Dampen a hand towel with **Monocoat Raw Wood Cleaner**.
- \* Clean/Tack a section of the wood. Add more cleaner as needed and continue the process. Replace or clean the towel as it becomes soiled.
- \* When finished allow the wood to dry until it regains its original color. Drying time: 15 minutes to 1 hour, depending on the degree of product that has been used to wet the surface.

### TECHNICAL CHARACTERISTICS:

Physical state at 68 °F: liquid.

Color: clear.

Final boiling point: 515 °C

Density [kg/m<sup>3</sup>]: 0,7 (59 °C)

Viscosity: 1,67 mm<sup>2</sup>/s (77°C)

Solubility in water: < 0,10 %

Flash point: > 143 °F

### PACKAGING:

1 and 5 liter can.

### CONSUMPTION:

+/- 750 sq. ft. / liter

### STORAGE:

The product can be stored for up to 12 months in dry conditions and in the original packaging.
